The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term open/close device is deemed indefinite; not clear if device is for opening or closing along a flow path.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP S56-59170. The Japanese Patent Application discloses the claimed invention and comprising: a single/double effect absorption chiller heart in which fuel control of solar heat warm a water supplier and a burner in accordance with an evaporation cooling water outlet temperature and a high temperature regenerator solution temperature. Furthermore comprising: a low temperature heat generator (1), utilizing solar heat to warm water, a three way valve disposed in the solar heated warm water supply detector

Art Unit: 3744

(26) provided on an outlet side of the high temperature regenerator and also comprising a cool water temperature detector (25) and a control device (27,20).
